### **DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-46 and 113-145, drawn to fault recovery including restoring a virtual path in an optical network by determining an alternative path connecting nodes with resources, classified in class 370, subclass 218.
- II. Claims 47-112, drawn to encoding a computer program code to execute the instructions stored in computer readable media of computer system, classified in class 714, subclass 755.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the two inventions I and II have different mode of operations.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for the examination purposes as indicated is proper.
